

Chapter 30: Designations

Introduction

- 30.1 A Minister of the Crown or a local authority with financial responsibility for a public work, or a network utility operator that has been approved as a requiring authority under section 167 of the Resource Management Act, may require land to be designated within the plan. The designations are shown on the planning maps.
- 30.2 The effect of a designation is that the requiring authority responsible for the designation may do anything that is in accordance with the designation, irrespective of the ordinary rules in the plan that might otherwise control the activity. Other people may not, without the prior written consent of the requiring authority, do anything in relation to the designated land that would prevent or hinder the project or work to which the designation relates. The zone rules regulate activities that are not covered by the designation.
- 30.3 Most of the designations in the plan have been rolled over from earlier plans with minor modifications under clause 4 of the First Schedule to the Resource Management Act. Most of these works have been give effect to. Designations that did not appear in previous plans are identified as being new in the schedules.
- 30.4 Designations for works that have not been given effect to lapse after five years unless a longer period has been specifically identified.
- 30.5 The following organisations are requiring authorities that have designations in this plan.

Waikato Regional Airport Limited – Designation NI

The designation appears on planning map 58.

The safe operation of aircraft using the Hamilton Airport requires that there be obstacle-free airspace around the airport. International specifications defining surfaces above which there must be no obstacle have been adopted by the Civil Aviation Authority of New Zealand. These surfaces are known as Obstacle Limitation Surfaces and are defined in terms of distances from the runways and heights relative to the runways.

The planned 2,984 metre long Main Runway and the Subsidiary Runway and their associated runway strips are defined as follows:

1. Main Runway:

The Proposed Main Runway once extended is 2,984m long (including 188m long starter extensions at each end) and 46m wide.

2. Main Runway Strip

The Proposed Main Runway is contained within the Main Strip. The Main Strip is 2,728m long by 300m wide. The coordinates and elevations of the four corners of the Main Strip, in terms of the Geodetic Datum 2000 - Mt Eden Circuit and the Moturiki Datum are as follows:

<u>mN</u>	<u>mE</u>	<u>Elevation</u>
<u>689584.61</u>	<u>449606.95</u>	<u>49.85</u>
<u>689500.00</u>	<u>449894.77</u>	<u>49.85</u>
<u>692201.79</u>	<u>450376.50</u>	<u>56.50</u>
<u>692117.17</u>	<u>450664.31</u>	<u>56.50</u>

3. Existing Subsidiary Runway Strip:

The existing Subsidiary Runway Strip is 748m long and 120m wide. The coordinates and elevations of the corners of the Subsidiary Strip, in terms of the Geodetic Datum 2000 - Mt Eden Circuit and the Moturiki Datum are as follows:

<u>mN</u>	<u>mE</u>	<u>Elevation</u>
<u>690876.23</u>	<u>449359.68</u>	<u>51.30</u>
<u>690756.78</u>	<u>449348.20</u>	<u>51.30</u>
<u>690685.32</u>	<u>450091.64</u>	<u>52.00</u>
<u>690804.77</u>	<u>450103.12</u>	<u>52.00</u>

4. Proposed Realigned Subsidiary Runway Strip

It is proposed to realign the existing Subsidiary Runway Strip. The length of the realigned strip will be 720m and the width will remain at 120m. The coordinates and elevations of the realigned subsidiary strip, in terms of the Geodetic Datum 2000 – Mt Eden and the Moturiki Datum are as follows:

<u>mN</u>	<u>mE</u>	<u>Elevation</u>
<u>690896.36</u>	<u>449420.14</u>	<u>51.30</u>
<u>690778.96</u>	<u>449445.88</u>	<u>51.30</u>
<u>690951.26</u>	<u>450141.22</u>	<u>52.00</u>
<u>691069.02</u>	<u>450117.51</u>	<u>52.00</u>

The Obstacle Limitation Surfaces associated with these runway strips are defined as follows:

5. Horizontal Surface:

The horizontal surface is above the Main Runway with an elevation of 97m Moturiki Datum. The outer limits are at a locus of 4000m measured from the periphery of the Main Strip.

6. Conical Surface:

The conical surface slopes upwards and outwards from the periphery of the Horizontal Surface at a gradient of 1 vertical to 20 horizontal (1 in 20) to an elevation of 202m above Moturiki Datum.

7. Main Strip Takeoff and Approach Surface:

There is a combined Takeoff and Approach Surface at both ends of the Main Strip. Each Takeoff and Approach Surface rises upwards and outwards from the ends of the Main Strip at a gradient 1 vertical to 62.5 horizontal (1 in 62.5) commencing at 56.50m above Moturiki Datum at the Northern end and 49.85m above Moturiki Datum at the southern end. The Takeoff and approach surfaces extend for a horizontal distance of 15,000m (15km). Each side of the Takeoff and Approach Surface diverges from the extended line of each edge of the Main Strip at a rate of 15% of the distance from the end of the Main Strip.

8. Subsidiary Strip Takeoff and Approach Surface:

There is a combined Takeoff and Approach Surface at both ends of the Subsidiary Strip. Each Takeoff and Approach Surface rises upwards and outwards from the ends of the Subsidiary Strip at a gradient of 1 vertical to 20 horizontal (1 in 20) to where it intercepts the Horizontal Surface. The sides of the Takeoff and Approach Surface diverge from the extended line of each edge of the Subsidiary Strip at a rate of 10% of the distance from the end of the Subsidiary Strip.

9. Transitional Side Surfaces:

These rise upwards and outwards from the sides of both the Main and the Subsidiary Strips and the edges of each Takeoff and Approach Slope to intercept with the Horizontal Surface. The Transitional slope for the main Strip is 1 vertical to 7 horizontal (1 in 5). All of the above surfaces are illustrated on the following diagram [to be inserted at plan update stage].

The Horizontal, Conical, main Runway Approach Surface at the northern end of the main Runway and the Subsidiary Strip Approach Surface at the end of the Subsidiary Strip extend into the Waikato District. In order to ensure safe and unrestricted operation of Aircraft using the airport, no building, object, structure or tree is to extend through or above these surfaces.
