Kia ora Waipā District Council,
Thank you for the opportunity to oppose the application from Global Contracting Solutions Limited for a waste-to-energy incinerator at 401 Racecourse Road, Te Awamutu.

My name is Breeana Taylor. I am a teacher at Flourish Early Learning, a local early childhood centre. My partner and I purchased our home in Te Awamutu in 2017 to raise our children (aged 6 and 4). This home is located directly opposite the proposed site. The implications for myself and my family if this goes ahead are detrimental and I strongly oppose the application.

I believe that the application to build a waste to energy incinerator at 401 Racecourse Road is completely inappropriate. This is an area surrounded by homes (including my own), schools, early childhood centres, sports grounds, parks and the Fonterra Dairy Factory. All of these places are used and loved by the Te Awamutu community. An incinerator in this area would devastate these public spaces, businesses and residential homes.

The extra traffic this project would add to Racecourse Road is unacceptable. With young children, I would feel unsafe taking them for walks along the footpath while large trucks carrying waste go past. 401 Racecourse Road is located on a sharp corner which is known for frequent reported and unreported accidents. The extra traffic, especially on this corner would add unnecessary risk for myself and other neighbours entering and exiting our drive-ways.

While the traffic is concerning, the pollution that will be created from this incinerator is truly alarming. Global Contracting Solutions Limited have released no environmental impact statement or a human health risk assessment. My own research into this matter has lead me to the findings of Professor Paul Connett who points out that incinerators create emissions which include dioxen, and it is impossible to remove all traces from being released into the air. He states there are no safe levels of dioxen, even trace amounts is too much. This creates an extreme health risk for all residents of Te Awamutu as exposure to dioxen can lead to disastrous effects on the nervous and reproductive systems.

This waste-to-energy incinerator would have a huge impact on our livelihood, as it is essentially in our backyard I am sure the value of our home would decrease dramatically. Our home is our largest investment and we do not want to see it devalued.

As well as traffic and pollution, I would like to add that I have come to the same conclusion as Professor Paul Connett: Incineration is an outdated way of dealing with our waste. In this modern day, we have far more sustainable

options available that offer steps to becoming a circular economy. Incineration creates no incentive for the people of today or the future to think about changing their habits in waste reduction. We live on a planet with a finite amount of resources and we must consider re-using and recycling as a much higher priority than incineration. Global Contracting Solutions Limited claim to be providing an alternative to landfill. I challenge that this is a terrible way to avoid landfill and results with a much more toxic ash being added to landfill instead. Te Awamutu is a future-thinking town, with strong plans to reduce waste in ways that do less harm to the environment. There is no place for a toxic incinerator harming our land, water and air quality – essentially our way of life.

I strongly urge the Waipā District Council to reject this application.

Re. Planning application reference number LI/0323/21.

Dear Sir/Madam,

The **Te Kōpua Marae Committee**, representing the 1,600 Ngāti Unu and Ngāti Kahu hapū members, **express our strong opposition to the proposed waste incinerator plant at 401 Racecourse Road, Te Awamutu.** In our capacity as mana whenua of the Kakepuku region and with many of our people living in and around Te Awamutu, we are concerned about the negative impacts of this project on the environment, health, and economy of our people.

Te Kōpua Marae has assessed the resource consent application using our mātauranga Māori tikanga and practices,ⁱ in particular utilising the Matariki framework endorsed by the Ministry for the Environment.ⁱⁱ The proposed waste incinerator plant **fails** the Matariki assessment criteria in the following categories:

Ururangi (air quality),

‘Our activities affect the quality of the air we breathe. Air quality is measured through the levels of particulate matter (PM10 and PM2.5) and the concentration of four gases – nitrogen dioxide (NO₂), sulphur dioxide (SO₂), carbon monoxide (CO), and ground-level ozone (O₃).’ⁱⁱⁱ From a Mātauranga Māori world view, any discharge of particle matter to air is unacceptable.

Waipunarangi (climate),

‘Changing climatic conditions can have multiple effects on species and their interactions, and these depend on their tolerance to change, habitat shifts, and migration. Shifts in the timing and severity of frosts, as well as a reduction in snowfall, are likely to create a mismatch between when plants flower and when their insect pollinators are active. This could adversely impact some plant species and strongly affect some ecosystem functions.’^{iv} From a Mātauranga Māori world view, any negative impacts to climate are unacceptable.

Tupuānuku (soil),

‘Soil is the basis for our food production. Keeping soil healthy and productive ensures we can maintain its ability to produce food and fibre for our own use and export.’^v From a Mātauranga Māori world view, any negative impacts to soil quality are unacceptable.

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),
Resource Management Act 1991

Western science provides supporting evidence to our Ururangi, Waipunarangi, and Tupuānuku assessments. A report from Zero Waste NZ^{vi} indicates the waste incinerator plant will produce large amounts of greenhouse gas emissions, toxic pollutants, and ash residues that will harm the local air quality (**failing** the Ururangi criteria), the climate (**failing** the Waipunarangi criteria), and the soil (**failing** the Tupuānuku criteria). The proposed waste incinerator plant **fails** two more Matariki assessment criteria:

Matariki (people and culture),

'The Parliamentary Commissioner for the Environment recently noted, it is broadly agreed that our economic and non-economic wellbeing are linked to the environment, now and in the future.'^{vii} From a mātauranga Māori world view, people and the environment are intrinsically linked through whakapapa (genealogy) and mauri (life force). Any negative impact to the environment is a negative impact to our flora and fauna relatives and is therefore unacceptable.

Hiwa-i-te-rangi (future aspirations).

'Our values and choices result in pressures on te taiao,^{viii} including land-use change and intensification, invasive species, pollution, natural resource use, and climate change. These pressures can result in the loss of ecosystems and species, and negatively impact on aspects of wellbeing, especially non-material aspects of wellbeing. These pressures can also leave a legacy, impacting the wellbeing of future generations.'^{ix} From a mātauranga Māori world view the preservation and security of future generations is paramount. Any negative impact to future generations is unacceptable.

The Zero Waste NZ report notes the incinerator will not contribute positively to local economy and jobs. Moreover, incinerators contribute to global warming by releasing carbon dioxide and methane, which are potent greenhouse gases.

The United Kingdom without Incineration Network reports^x that incinerators emit many toxins and pollutants that harm human health, such as dioxins, furans, mercury, lead, and particulate matter. These substances can cause cancer, respiratory diseases, birth defects, and neurological disorders. All of these negative factors contribute to the incinerator **failing** the Matariki criteria.

The Guardian (UK) published an article^{xi} in December 2021 reporting incinerators are incompatible with Paris Agreement on climate change,^{xii} an agreement New Zealand ratified on 4 October 2016. Te Kōpua Marae also notes the incinerator would therefore be incompatible with the NZ Government's aspirational target of 100% renewable electricity by 2030.^{xiii} These negative factors contribute to the incinerator **failing** the Hiwa-i-te-rangi criteria.

In conclusion, **Te Kōpua Marae urge you to reject the planning application** for the waste incinerator plant at 401 Racecourse Road **in its entirety**. This project will have devastating consequences for the environment, health, and economy of our people. Instead of burning waste, we should invest in more sustainable and efficient waste management options, such as waste minimisation, recycling, composting, or anaerobic digestion.^{xiv} These methods are better aligned to Māori aspirations in relation to te taiao and will reduce waste, save energy, create jobs, and protect our future.

Thank you for your attention and consideration.

Sincerely,

Gary Te Waraki Te Ruki

Notes to submitter

If you are making a submission to the Environmental Protection Authority, you should use form 16B.

The closing date for serving submissions on the consent authority is the 20th working day after the date on which public or limited notification is given. If the application is subject to limited notification, the consent authority may adopt an earlier closing date for submissions once the consent authority receives responses from all affected persons.

If you are a trade competitor, your right to make a submission may be limited by the trade competition provisions in Part 11A of the Resource Management Act 1991.

You must serve a copy of your submission on the applicant as soon as reasonably practicable after you have served your submission on the consent authority.

If you make your submission in hard copy please deliver to Waipa District Council, 101 Bank Street, Te Awamutu or 23 Wilson Street, Cambridge or post to Private Bag 2402, Te Awamutu 3840

If you make your submission by electronic means, a signature is not required. Electronic submissions on resource consent applications must be directed to submissions@waipadc.govt.nz.

If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity.

Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious;
- it discloses no reasonable or relevant case;
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further;
- it contains offensive language;
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

(this is required by section 96(6) (b) of the Resource Management Act 1991)

My submission - reason for my views

Hello we moved to Te Awamutu two years ago to a community of connected, health aware, family oriented people who are many of farming backgrounds and who share values of care of the environment.

There are extremely dangerous proven negative effects of incineration plants.

The impact on the health of our people, our economic success, our international reputation of ~~clean~~ clean, healthy natural food production will be severely damaged should this plant go ahead.

Our land is our heritage, water our life and must not be compromised and damaged with toxic materials.

I value the protection of our natural environment and our ability to trade products which are untainted by heavy metals and other toxic waste.

I support our wildlife and natural fauna and flora and their right to exist in a pristine environment.

Roy Trebilco

We moved to Te Anau because it was a nice quiet town. This proposal will affect this town negatively, especially the health, wellbeing and quality of life. There are no benefits for the people of Te Anau, and the Council is required to work for the benefit of the people under the Local Government Act 2002 section 10(1).

As this submitter has a record of violating his resource consent conditions, he should not be allowed to have another resource consent at all, let alone an untested, hazardous, polluting, smelly and enormously impacting ^{one} on the local people. The location is too close to schools houses & farms.

The land is unsuitable as it is a flood zone. If (and it's a very big if) New Zealand needs an incinerator it should be located right next to the motorway to reduce transport impact on communities.

There has been no or insufficient environmental, health, traffic, safety independent reports done and before any submission can be considered these must be done.

The huge impacts are obviously detrimental to quality of life for people living near and in Te Anau.

I value the quality of life here and the environment and quality of food is also very important to me.

I don't want my children, or grandchildren or myself breathing toxins, smelling odours and having fumes, houses, schools and people contaminated.

I am/am not directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

My submission relates to the whole application
Environmental impact, particularly land & air pollution
Impact on human health
Impact of traffic volumes on our roads
Impact on our water resources & environment

My submission is:

Support parts or all of ☐ **Oppose** parts or all of ☒ **are neutral** parts or all of ☐

- the reasons for your views.

Approximately 2 tonnes of fly ash (though estimated to be much higher) is not only adding greenhouse gases to the atmosphere but emits toxic particles, particularly dioxins, into the air. There is no safe level of dioxins. I have concerns for my staff and their families. Our business is extremely close to the proposed incinerator site (as the crow flies) and our air quality will be impacted (regardless how minimally)

Personal human health should never be at risk and there has been no Human Health Assessment undertaken.

Our roads leading to Te Awamutu are already in poor condition and apart from the toxic fly ash, the additional traffic volume (particularly trucks) will add to the air pollution burden through exhaust fumes etc.

This is a hazardous facility being put in the middle of a town that has only a volunteer fire brigade & a vulnerable population.

This project does not align with the Waipa Community Spatial Plan that has been pushed out to the community nor the councils Kihikihi Pathway which was promoted as an effort to help people safely opt out of cars in an effort to "reduce" emissions under the Emissions Reduction Plan.

I also refer you to the Waste to Energy guide for NZ <https://environment.govt.nz/publications/waste-to-energy-guide-for-new-zealand/>

That document mentions four basic principles I would suggest that the proposal does not meet any of them. It certainly doesn't meet Principle 1 (lets look at the Zero Waste Network instead), Principle 2 (this company has a bad track record for environmental compliance) Principle 3 (unable to comment) and Principle 4 (most definitely not – an example is the phenomenal turnout of protesters on Sunday 8th October marching against this)

Four basic principles

Proposals for WtE plants are likely to come to businesses, local government and central government agencies. They can be complex and can look very attractive initially. But closer examination can expose the challenges that might arise in the New Zealand context. This factsheet highlights a number of questions to consider when testing WtE proposals, grouped into four basic principles.

Principle No	Definition
Principle 1	The proposal should support the goal of moving New Zealand steadily up the waste hierarchy towards a more circular economy approach to managing resources.
Principle 2	The environmental impacts must be well managed, especially the greenhouse gas emissions.
Principle 3	The proposal must be commercially viable over the long term.
Principle 4	There should be a strong level of support from the community and Treaty partners.

There are some very pertinent questions throughout that document which have not been addressed. In fact I cannot see how Incinerators fit into the NZ Ministry of Environments long term reuse/reduce/recycle goals at all.

I oppose the Plant as the transport study I believe does not include effects of truck noise. I live on Ohaupo rd and a increase of 120 trucks from the north coming down SH3 into a residential area will have an affect on residents wellbeing. Currently there is no way of stopping engine braking coming down into Te Awamutu as council cant enforce it (currently most of trucks now use engine braking which is getting worse) so more wont help this.

There needs to be a law relating to this sites trucks noise and other companies.

In relation to roading our roads have a lot of pot holes dips etc which when trucks go over them create banging from bouncing up and down, Empty trucks especially.

This transport study is now out dated as it was also done 2 years and doesn't reflect current vehicle movements, there is a lot more cars on roads.

I seek the following decision from the consent authority:

give precise details, including the parts of the application you wish to have amended and the general nature of any conditions sought

Enforce engine braking laws Te Awamutu wide.

Move the entrance to site to factory road behind dairy factory

Upgrade roading surfaces in relation to smothness (pot holes etc) on SH3 up taylors hill and racecourse rd

Consider reducing speed limit on Ohaupo rd to 50 km phr from 70km

A new study relating to noise effects on residents on Ohaupo and Racecourse rd.

Approximately 2 tonnes of fly ash (though estimated to be much higher) is not only adding greenhouse gases to the atmosphere but emits toxic particles, particularly dioxins, into the air. I understand it is illegal in NZ to burn a single tyre however this plant is proposing 35,000 tonnes of tyres per year which also emit a raft of toxins including dioxin. There is no safe level of dioxins. In addition the incinerator will create 23 tonnes of ash waste, most will go to landfill, again contaminating the ground with heavy metals and dioxins. Personal human health is of utmost importance to all human beings and there has been no Human Health Assessment undertaken. I invest dearly in my surrounds and environment to minimise chemical exposure and pollutants for the health of myself and my family. The human health impact is particularly concerning for the young people in our community, knowing there are education centres near to the proposed site. Any negative impact on our health must be non negotiable, regardless of how "minimal". This is a hazardous facility being put in the middle of a town!

I have also taken note of the Spatial plan presented by Waipa District Council which detailed and promoted the ecological corridor to link Maungatutari and Pirongia. One of the "stepping stones" on the plan is in my area and I have seen the new biodiverse plantings underway. Surely an incinerator would undermine these efforts.

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),

Allowing this plant to be built in town is detrimental to the residents of Te Awamutu. Not only will it increase the traffic and noise in the area, right next to a preschool, but it will put health and wellbeing of the entire town at risk. Notes to submitter

If you are making a submission to the Environmental Protection Authority, you should use form 16B.

The closing date for serving submissions on the consent authority is the 20th working day after the date on which public or limited notification is given. If the application is subject to limited notification, the consent authority may adopt an earlier closing date for submissions once the consent authority receives responses from all affected persons.

If you are a trade competitor, your right to make a submission may be limited by the trade competition provisions in Part 11A of the Resource Management Act 1991.

You must serve a copy of your submission on the applicant as soon as reasonably practicable after you have served your submission on the consent authority.

If you make your submission in hard copy please deliver to Waipa District Council, 101 Bank Street, Te Awamutu or 23 Wilson Street, Cambridge or post to Private Bag 2402, Te Awamutu 3840

If you make your submission by electronic means, a signature is not required. Electronic submissions on resource consent applications must be directed to submissions@waipadc.govt.nz.

If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity.

Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious:
- it discloses no reasonable or relevant case:
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further:
- it contains offensive language:
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

Non-renewable energy created by incineration will not help the climate crisis. Instead it will add to it with increased noise, traffic and air pollution. The dioxins produced by this plant will be emitted into the air and settle in water and land where they will accumulate. There are no safe levels. The company applying is inexperienced and will not be able to adhere to resource conditions as their current track record seems to prove. I do not believe this is the answer to waste disposal issues.

Notes to submitter

If you are making a submission to the Environmental Protection Authority, you should use form 16B.

The closing date for serving submissions on the consent authority is the 20th working day after the date on which public or limited notification is given. If the application is subject to limited notification, the consent authority may adopt an earlier closing date for submissions once the consent authority receives responses from all affected persons.

If you are a trade competitor, your right to make a submission may be limited by the trade competition provisions in Part 11A of the Resource Management Act 1991.

You must serve a copy of your submission on the applicant as soon as reasonably practicable after you have served your submission on the consent authority.

If you make your submission in hard copy please deliver to Waipa District Council, 101 Bank Street, Te Awamutu or 23 Wilson Street, Cambridge or post to Private Bag 2402, Te Awamutu 3840

If you make your submission by electronic means, a signature is not required. Electronic submissions on resource consent applications must be directed to submissions@waipadc.govt.nz.

If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity.

Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious:
- it discloses no reasonable or relevant case:
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further:
- it contains offensive language:
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

This is a submission on:

APPLICANT'S NAME: Global Contracting Solutions Limited

LOCATION: 401 Racecourse Road, Te Awamutu

I am/am not* a trade competitor for the purposes of section 308B of the Resource Management Act 1991.

I am/~~am not~~ directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

I am making a submission regarding the non-complying Resource Consent Application being made by Global Contracting Solutions Ltd. My main concern is around the air discharge consent application.

My submission is:

Support parts or all of ☐ **Oppose** parts or all of ☒ **are neutral** parts or all of ☐
include—

- the reasons for your views.

My name is Anthony Turnbull. I have been a resident of Waipa for the last 7 years.

I am a professional mechanical engineer with 30 years' experience in various process industries. This has involved boiler operation, compliance & maintenance. I have also been involved with the conversion of a coal fired boiler to wood pallet operation.

This Resource Consent Application is no-complying with regard air discharge. This is concerning especially with regard to the generation Dioxins & Furans. Assumptions around dioxin generation have been stated in the consent application, but with very little supporting evidence.

Noted in the consent application Section 4.9.6 Dioxins & Furans, "Long term exposure causes a range of toxicity, developmental and neurodevelopmental effects, effects of thyroid and steroid hormones and reproductive function. Particularly vulnerable are the foetus or neonate. "

Also of note is that several European studies of land surrounding incinerators have indicated significant absorption & concentration of dioxins into livestock, particularly dairy cows. There is no base level data for dioxin levels in Te Awamutu.

The predicted dioxin generation rate of the proposed incineration process for a 24 hour average is predicted at 50 fg I-TEQm-3 , compared to a relevant standard maximum of 100 fg ITEQm-3"
Although within national air standard compliance you are expecting to discharge up to 50% of the allowable limit.

There are a number of important questions Waipa District Council need to consider before ever approving this application. There is very limited detail in the application around such a critical aspect of the air discharge control.

With such a variable fuel feed stock, i.e. varying plastics waste how can you begin to estimate the levels of dioxin produced & therefore the removal rate? Even materials such as coal have highly variable combustion & ash generation properties, making it challenging to control air discharge.

What are your assumptions around your estimate of dioxin generation & how sensitive are these to feedstock change?

What are the limitations of the proposed process to remove these?

What safeguards are in place to prevent a high dioxin discharge rate on cold start up when furnace temperatures are low?

What happens in the event of a breakdown or a plant trip?

What in process monitoring do you have for trace gases?

Is annual testing of several days per year adequate?

I seek the following decision from the consent authority:

give precise details, including the parts of the application you wish to have amended and the general nature of any condition s sought

I oppose this application. I want the Waipā District Council to decline this application.

Submission on a Notified Resource Consent Application

Form 13

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),
Resource Management Act 1991

This is a submission on: LU/0323/21

APPLICANT'S NAME: Global Contracting Solutions Limited

LOCATION: 401 Racecourse Road, Te Awamutu

I am not a trade competitor for the purposes of section 308B of the Resource Management Act 1991.

The entire application

My submission is:

In opposition to the whole application by Global Contracting Solutions Limited

Support parts or all of ☐ **Oppose** parts or all of ☒ **are neutral** parts or all of ☐
include—

- the reasons for your views.

Thank you for the opportunity to submit my opposition to the application made by Global Contracting Solutions to have an incinerator plant in Te Awamutu, I want Waikato Regional Council to show leadership and decline this application.

I do not live in the Waipa area, however I have whakapapa links to this area and feel strongly about the waste to energy plant proposed for Te Awamutu and find it highly concerning that here in Aotearoa we are considering this as an option for managing waste. Waste to Energy plants do not have a place in Aotearoa.

I live in the seaside community of Whaingaroa/Raglan where we have a strong community commitment to doing better for the environment, our land, our moana, our people, not only for today but for future generations.

Waste to energy is not the answer to addressing waste, in fact it is the antithesis of this and requires more waste to be generated to keep it operating. In our communities we should be promoting Rethink, Reduce, Reuse, Recompose, Repair and have local resource recovery centers throughout Aotearoa and our communities, providing communities opportunities to take ownership of their waste, plus provide opportunities for employment and building resilience.

From Dorte Wray, general manager of Zero Waste Network - RNZ 30th September 2023:

'Incinerators are just another form of disposal like landfill'

'This one would have a dramatic climate impact.'

Wray said the organisation stopped the waste-to-energy proposal in Feilding and will fight to do the same in Te Awamutu.

'Along with the human health and climate impacts, the proposal site is subject to severe flooding. This incinerator would pose a major hazard to the community'

- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further:
- it contains offensive language:
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

Privacy information

The information you have provided on this form is required so that your submission can be processed under the RMA. The information will be stored on a public register and held by the Council, and may also be made available to the public on the Council's website. In addition, any on-going communications between you and Council will be held at Council's offices and may also be accessed upon request by a third party. Access to this information is administered in accordance with the Local Government Official Information and Meetings Act 1987 and the Privacy Act 1993. If you have any concerns about this, please discuss with a Council Planner prior to lodging your submission.
